...A New Generation

SAINT ALBERT THE GREAT

## Project Update 2

### *Dear Parish Family....*

The week of September 1st witnessed the pouring of the foundation of our future Parish life Center. What appeared as a “concrete lake” reveals the outline of this magnificent new facility for the ministry of St Albert the Great.

For those unfamiliar with the construction process, this pouring of the foundation followed several weeks of preparation including the digging of footers and the laying of pipes and drains and electrical conduits. The foundation pouring was followed immediately by our great parishioner-masons of the King family, as they placed the courses of block surrounding the outline of the entire building. The bricklayers also installed the concrete block fire wall separating the new facility from the school building. That fire wall of concrete block forms the connecting hallway between the Parish Life Center and the existing St. Albert school building.

### **Digital 3-D tour of Parish Life Center**

Project architects, DS Architecture, have provided us with a very lifelike 3-D virtual tour of the new Parish Life Center. We have posted this virtual walk-through on our parish website [www.saint-albert.org](http://www.saint-albert.org). Some highlighted photographs from that virtual tour are included here for your enjoyment.

**Tower entrance to the PLC**

**Reception area to parish office**

**Rear view of PLC from patio**

**The grand hall with view of the stage**

## **Progress on the Grounds and Building**

A new concrete grand staircase connecting parking lot “B” to the new Parish Life Center tower entrance were completed this summer in preparation for the beginning of school. The all important connecting hallway between the Parish Life Center and the existing school building has begun to take shape.
